Summary

Software Engineer with 9+ years of experience architecting systems and driving digital transformation. Demonstrated success in migrating 200+ enterprise clients to a 100% paperless maritime ecosystem, achieving 24/7 uptime and a perfect 100% project acceptance rate. Scaled cross-functional engineering teams from 2 to 11 members and modernized a 20-year-old legacy system, drastically reducing query response times from 15 minutes to seconds. Currently engineering an autonomous Multi-LLM AI platform aimed at eliminating manual operational workflows.

Experience

Founder & Software Engineer, Yocatetin Data Inteligensia – Indonesia Feb 2026 – present

- Architected and deployed an autonomous Multi-LLM AI API platform using Rust and Next.js, successfully launching 2 live products capable of zero-touch data processing.
- Engineered an auto-scaling cloud infrastructure on GCP and AWS, guaranteeing continuous system availability and optimal resource allocation without manual intervention.
- Established robust testing pipelines using Playwright and JUnit to maintain high reliability across continuous deployment cycles.

Frontend Developer (Contract), Samatech – Surabaya Nov 2023 – Aug 2025

- Resolved critical bugs and maintained internal enterprise applications, ensuring high system reliability and smooth daily operations across the company.
- Engineered a custom logistics management system using Next.js, digitizing manual workflows and significantly increasing operational efficiency for a key client.

Senior Full-Stack & Server Engineer, PT Sarana Abadi Lestari (SAL) – Indonesia July 2022 – Oct 2025

Architected, deployed, and managed both application architecture and server infrastructure for a 100% paperless maritime Port Business Entity (BUP) ecosystem.

- Spearheaded the digitalization of complex maritime workflows by partnering with enterprise tenants (e.g., PT Pertamina Patra Niaga (PATRA), PT Triputra Energi Megatara (TEM), PT Palaran Indah Lestari (PIL), Schlumberger), achieving a 100% project acceptance rate across all integrations.
- Led the end-to-end development of 3 critical real-time monitoring platforms (Vehicle Land Route, River Route, Secure Digital Pass), directly securing 17+ new growth contracts through strategic roadmapping.
- Architected a fault-tolerant VPS and cloud infrastructure using PM2, BullMQ, and Sentry, achieving strict 24/7 system uptime and zero data loss for jetty maritime operations.

Independent Consultant / Freelance Software Engineer, SCODEID – Indonesia Mar 2017 – Jan 2026

- Founded an independent tech consultancy, delivering 10+ custom web and mobile solutions for global clients across India, Japan, and Indonesia.
- Developed a cross-platform leave attendance application for international firms using Flutter and Riverpod, implementing Domain-Driven Design (DDD) to ensure code scalability.
- Revitalized a legacy pesticide information app by enhancing UI/UX with Flutter GetX, significantly improving user retention and accessibility.
- Built and deployed dynamic HR applications, utilizing AI coding assistants to accelerate feature delivery and reduce development cycles.
- Provided technical SDK consultancy for an Indian client, securing the first international Upwork contract by demonstrating deep architectural expertise.

Co-Founder (Full-Time), PT INDEKS MEDIA TEKNOLOGI – Samarinda

Dec 2020 – May 2022

- Modernized a 20-year-old legacy Japanese desktop application into a scalable web platform using Vue.js and Laravel, translating 200+ Figma designs into functional modules.
- Slashed database query response times from 15 minutes to under 5 seconds by optimizing complex queries across MySQL and Oracle 12c databases featuring Japanese localization.
- Scaled a cross-functional engineering team from 2 to 11 members, seamlessly integrating multilingual support by collaborating with certified translators.
- Delivered high-profile international projects, including an Australian Payment Gateway (Auspost) integration and a Polish Gallery platform.

Instructor Junior Mobile Programmer, Digital Talent Scholarship – POLNES

Nov 2019 – Nov 2019

- Mentored vocational (SMK) and university students in native Android development, improving their foundational algorithm knowledge through hands-on Kotlin instruction.
- Led the final project evaluation phase, enabling students to successfully earn their programming certifications.

Android Developer | Kuliah Kerja Praktek (KKP), CV. PAULFEN MANDIRI – Samarinda

July 2019 – Sept 2019

- Developed and launched (internal) a native Android e-commerce application for groceries using Java and Kotlin, establishing a seamless single-codebase architecture.

Network Engineer | Praktek Kerja Lapangan (PKL), Eastkal Supply Base – Penajam

Jan 2016 – Apr 2016

- Configured and maintained enterprise network infrastructure using Ubiquiti, MikroTik, and Cisco, ensuring high availability for port operations.
- Deployed and secured Jetty CCTV systems across the Marine Tower and RIG Area, enhancing perimeter security monitoring.

Skills

Languages: English (Intermediate), Indonesian (Proficient), Japanese (Beginner).

Frontend & Mobile: Android Native (Jetpack Compose) Kotlin, Java, Flutter (Riverpod, BLoC, GetX), Vue.js, React, Next.js, Rust Egui, SSR, SSG, Contentful.

Backend & Architecture: Microservices, MySQL, Oracle 12c, GraphQL, Node.js, PM2, Sentry, Laravel, Redis, BullMQ, Clean Architecture, Domain-Driven Design (DDD), Software Design.

Cloud, DevOps & Tools: Cloud Infrastructure (AWS, GCP, VULTR, Cloudflare), VPS, Docker, Firebase, CI/CD (GitHub Actions), Jira, Agile/Scrum.

AI & Testing: OpenAI API, Vertex AI, Multi-LLM, Playwright, JUnit, Espresso, Mockito.

Certifications

Google Certification Skill - Artificial Intelligence.

Alibaba Cloud - Big Data: A Quick Guide to Process Structured Data with Python.

Oracle Database Foundation.

Dicoding - Kotlin Android Developer Expert.

Flutter Development Bootcamp with Dart.

Indonesian Professional Certification Authority - Programming and Software Development.

Fifteen Great CTO Leadership Hacks.

Competition

<u>The National Polytechnic Informatics Student Competition held at Politeknik Caltex Riau.</u>	Sept 2020
<u>Bali Startup Camp Held at STMIK Primakara Denpasar.</u>	Dec 2019
<u>Samarinda Hackathon 2.0.</u>	Aug 2019

Education

Politeknik Negeri Samarinda, A.Md.Kom in Informatics Engineering – Samarinda, Nov 2017 – Nov 2020
Indonesia

- GPA: 3.91/4.00 [View Transcript](#).
- Recognized as one of the top 21 graduates in the class of 2020.
- [International Centre for English Excellence \(ICEE\) Certificate of Completion \(One Year Program\)](#).
- [TOEFL](#).

SMK Negeri 2 Penajam Paser Utara, in Computer and Network Engineering Jan 2014 – Jan 2017

During my studies, I gained practical experience by configuring Mikrotik and Debian servers (DNS, VPN, Bind9, Mail Server) on VMware and working with Ubiquiti networks.

- [Certificate of Competency in Network Engineering](#).
